

Trash and recycling collection is one of the valuable community services provided by the Castle Pines Homes Association and is paid for out of the monthly maintenance assessments. The following information details the policies and procedures for the trash and recycling collection program within the Village. If you have questions or need more information please contact the CPHA office.

Waste Management is the contracted service provider for all trash and recycling collection within the Village.

**Waste Management's customer service number is 303-797-1600.**

### Trash Collection Policy

- Pickups are twice a week and are scheduled for either Mondays & Thursdays OR Tuesdays and Fridays, depending upon where you live. See the enclosed map for the split pick up schedule.
- Garbage totes and cans of any kind are not permitted in the Village.
- Garbage must be put out in plastic garbage bags. Please do not use the white kitchen garbage bags as they are extremely vulnerable to birds and other wildlife. The CPHA recommends using the contractor type, black garbage bags with a rating of 2 mil or greater thickness.
- Bags can be placed outside no earlier than 5 am on the day of pickup. Trash may not be put out the night before. Please have your garbage and recycling out no later than 7 am as the WM trucks are in the Village picking up garbage promptly at 7 am.
- WM will pick up a **maximum of 10 garbage bags per residence**. If you have large items to dispose of, moving boxes or crates, or more than 10 garbage bags please contact WM customer service at 303.797.1600 to schedule a special pick up as they will not pick up these items without prior arrangement and there may be a fee associated.
- Recycling containers are available at the CPHA office. Residents may check out a maximum of two containers, free of charge. Visit the front reception to sign them out. See the link above for more recycling info
- Garbage bags and recycling containers are to be placed at the end of your driveway near the roadway. For residences on common roadways please make sure to place garbage bags several feet back from the roadway during heavy snow days so that the snow plows can navigate the streets successfully.
- WM will take branches and limbs as long as they are cut into sections 4' long or less and tied into bundles. They will not pick up loose piles of branches. Please note that the Metro District has twice yearly, spring and fall, brush clean up events where they will pick up bundled tree branches.
